

Instructor Comment:

Linda was very easy to understand and she provided new ideas on how to learn organic chemistry. She's the reason why I know fisher projections!

She was able to relate to college students to teach us the material. Made sure to answer our questions by provoking thoughts and never explicitly giving us the answer.

Linda is always so friendly, willing to help and kind!

She was very helpful during the Friday classes and explained material well to us that we did not fully understand from the lecture.

Linda has been a wonderful TA. She has been able to help us through problems giving us different approaches as well that as sometimes easier to understand.

Okay so Linda was really, really fantastic as a TA. You could tell that she totally meant business. When we came in for recitation she was always on time and ready to go. She let us ask any questions we wanted and then did a short and helpful review before the quiz. She was awesome at explaining stuff in different ways so that the class could understand it. I really felt like I was more successful in this class thanks to her.

Instructor Comment:

She is such a great teacher and has helped me to understand a lot of material.

Very good at explaining things, there was never enough time to go over enough material in recitation

Great TA! she helped a lot.

I loved Linda, her explanation in recitation helped my grade a lot

Instructor Comment:

Linda Barbeto was a spectacular teaching assistant. I find her research with sand flies to be highly interesting.

She was absolutely wonderful! I really enjoyed going to the Friday sessions because of how much confusion she cleared up in such a little amount of time!

Linda is a fantastic TA who explained confusing aspects of organic chemistry very well.

Linda was kind and easy to understand. Office hours were helpful as well as resubmission.

Instructor Comment:

She is a wonderful teacher and has helped me tremendously over the course of the semester.

She was an amazing TA. She often explained things in a more straight to the point easier to understand manner which was amazing for clearing up confusion before exams.
