I loved Linda, she made Organic Chemistry easier to understand and she was so friendly. It's impressive that she was able to wake up to early and teach us and answer our questions when she's with child (currently). I truly loved her as a TA and would want her for Orgo II.

An amazing instructor who knew what she was doing and was very capable of reviewing/teaching topics in class.

LINDA IS AMAZING, I love Linda. Linda should teach orgo 2. Honestly though I've never had a more helpful peer leading teacher. She explains concepts very well and makes sure that we are understanding the material as best as we can.

Linda was an excellent TA and she made learning organic chemistry so much easier to understand and learn. The TA sections really added to my knowledge of the subject and she was always positive and tried her best to help the class.

She was a great teacher, knew her stuff and was very engaging

Well informed TA that I came to respect and appreciate very much

Sometimes taught better than the professor himself.

Instructor Comment:

I enjoyed having Mrs. Barbeto. She was very helpful with all of our questions and she simplified material that seemed to be impossible to simplify.

She is great! Is very passionate and explains the material in ways that we can understand.

Linda is an amazing TA, she made time to meet with me for tutoring besides her office hours. Very knowledgeable in organic chemistry as well.

Loved her as a TA , she would explain in a way I could follow and also very loud spoken.

She's very intelligent and would be an excellent professor!

Linda was a very sweet and caring instructor. It is clear that she is knowledgeable in organic chemistry and cares for her students and their wellbeing. I loved having Linda as an instructor.

Amazing TA. She always made sure we understood every concept and answered questions to the fullest of her abilities.

She knows her stuff! She never missed a class and was always willing to help! She should be a professor.

Linda was a great peer leader. She made the Friday help sessions very beneficial. She answered questions clearly and made sure we were prepared for our quizzes and tests.

Instructor Comment:

Linda was very helpful on helping us through the course with any question regarding the class material. She went out of her way to make sure we knew exactly how to do and know what was asked from us. One of the best TA i ever had.

Linda is awesome, she would make a great professor.

One of the best TAs I have had. Super helpful.

Great and helpful TA!

I wish I had the honor to be one of her students full time and not just for 50 minutes. She did such an incredible job explaining a very difficult subject and I cannot thank her enough for that. She was hilarious and would always make my Friday afternoons worth while because who in their right mind wants to go to classes on a Friday anyways? There is no doubt that her future students will be nothing but successful. She has the potential to make a significant impact on many student's lives and college education. If there were an award for the best TA, I would give it to her and I had quite the handful of TA's in the four years I have been at this school. Thank you, Mrs. Barbeto!!

Instructor Comment:

Best TA I have ever had

Very helpful and easily helped us strengthen our knowledge

Linda was a great instructor and TA. She thoroughly went over concepts despite the little time we had and always answered our questions. She was great.

Linda was an awesome TA who always encouraged us to come see her during office hours and receive extra help if needed. I think her knowledge of organic chemistry was very helpful and she always made an effort to make sure everyone understood the material even if it meant showing us from a different perspective with these organic molecules.
